

Suburban Swim League Website How-To

Uploading Meet Results

To upload your meet results please follow the steps below.

1. Find your meet in the schedule and click the Upload Results button. Note: the button will only show for Team Admins from the home team. In the screenshot below I am logged in with a Pennypacker Team Admin account.

2. In the Upload Results dialog box, first select the winning team, then click the Choose File button and select the results PDF created from Meet Manager. It's important that you select the proper team in the Winning Team dropdown as this is used to build the Standings.
